

AASHIR ATHAR

Senior React Native Developer

aashirathar@gmail.com | +92 307 477 8889 | Lahore, Pakistan | linkedin.com/in/aashirathar | github.com/aashir-athar

PROFESSIONAL SUMMARY

Results-driven Senior React Native Developer with 3+ years of experience architecting and shipping production-grade, cross-platform mobile applications for startups and mid-sized technology firms across the US and Pakistan. Proven record of leading end-to-end mobile initiatives — from system architecture and feature development to CI/CD automation and App Store deployment — serving 50,000+ active users. Skilled in TypeScript, Expo, Firebase, and modern JavaScript ecosystems, with a strong emphasis on performance optimization, clean modular code, and team mentorship.

TECHNICAL SKILLS

Languages & Frameworks:	JavaScript (ES6+), TypeScript, React Native (Expo), Redux, Next.js, Node.js, Express.js
Mobile & Backend:	Firebase (Firestore, FCM, Auth), MongoDB, SQLite, RESTful APIs, Deep Linking, Push Notifications, Biometric Auth
DevOps & Tooling:	Git, GitHub Actions, Fastlane, Sentry, Flipper, JIRA, Trello
Design & UI:	Figma, Adobe XD, Material UI, Pixel-Perfect Implementation, Wireframing
Authentication:	Clerk (OAuth, MFA), JWT, Firebase Auth

PROFESSIONAL EXPERIENCE

React Native Developer

May 2024 – Present

3STechLabs — Remote (United States)

- Delivered complex, production-ready features including biometric authentication and real-time data syncing across cross-platform React Native apps using Firebase and RESTful APIs.
- Spearheaded UI/UX enhancements that directly increased user engagement by 20% within the first two months of release.
- Diagnosed and resolved critical production bugs using Flipper and Sentry, improving app stability and reducing crash rates across both Android and iOS platforms.

Senior React Native Developer

June 2023 – April 2024

AppGlide Technologies — Remote

- Architected and led the development of 3 production-grade React Native (Expo) applications collectively serving 50,000+ active users.
- Mentored 4 junior developers through structured code reviews and modular coding standards, cutting team onboarding time by 40%.
- Designed and implemented CI/CD pipelines using Fastlane, reducing manual deployment errors by 90% and enabling reliable, repeatable releases.
- Collaborated cross-functionally with product and design stakeholders to ship MVPs within 6–8 weeks, consistently aligning engineering decisions with business objectives.
- Achieved a 35% reduction in app load time by implementing lazy loading, image compression, and navigation architecture refactoring.

Junior React Native Developer

February 2022 – April 2023

TechNova Solutions Inc. — Remote (United States)

- Improved overall app performance by 25% by reworking data-fetching logic and implementing asynchronous caching strategies with Firebase.
- Successfully deployed multiple consumer-facing applications to the Apple App Store and Google Play Store with zero post-launch crashes.
- Actively contributed to Agile sprint planning and estimation ceremonies, consistently delivering features ahead of schedule.

UI/UX Designer & Graphic Designer (Part-Time)

October 2021 – March 2023

W3 Technologies — Remote

- Translated business requirements into polished, responsive UI/UX mockups using Figma and Adobe XD for mobile-first products.
- Collaborated directly with React Native development teams to maintain visual consistency across all mobile components and screens.

KEY PROJECTS

xMind — Open Source Social Media Platform

github.com/aashir-athar/xmind-app

[React Native \(Expo SDK 53\)](#), [TypeScript](#), [Express.js](#), [MongoDB](#), [Clerk Auth](#), [Cloudinary](#)

- Architected and built a full-stack, Twitter-like social media platform from the ground up as an open-source project, covering cross-platform mobile frontend and RESTful backend API end-to-end.
- Implemented enterprise-grade authentication via Clerk with multi-provider OAuth (Google, Apple, GitHub), MFA support, real-time username validation with profanity detection, and JWT-secured endpoints.
- Engineered an AI-powered feed ranking algorithm weighing engagement metrics (40%), recency with exponential decay (25%), social connection strength (20%), and content quality score (15%) for optimal content discovery.
- Built a 50+ component design system with 60fps animations via React Native Reanimated 3, advanced gesture recognition with haptic feedback, and fully adaptive layouts across iOS and Android.
- Delivered multi-entity global search (users, posts, hashtags), real-time hashtag trending detection, threaded comment system, and smart notification center with priority ranking.
- Secured the platform with rate limiting, input sanitization, XSS protection, end-to-end data encryption, and full GDPR compliance with data portability.

Crypto Price Tracker

github.com/aashir-athar/Crypto-Price-Tracker

[React Native](#), [Bitget API](#), [TypeScript](#)

- Built a real-time cryptocurrency tracking app integrating the Bitget API to deliver live price updates refreshed every second across all major coins.
- Implemented personalized coin favoriting, portfolio management, top-gainer leaderboards (1-min and 60-min intervals), and detailed 24-hour market data (high/low, funding rate, price change).
- Engineered an optimized caching and error-handling layer to ensure smooth, uninterrupted performance under high-frequency data loads.

BludStack — Blood Donor Matching App

github.com/aashir-athar/BludStack-iOS-Application

[React Native](#), [Firebase](#), [iOS](#)

- Developed a civic-impact iOS application that matches blood donors with recipients in real time using geolocation and Firebase Firestore.
- Designed the full donor-request flow including registration, blood type filtering, location-based matching, and in-app push notifications.

Trade Ease — P2P Marketplace App

github.com/aashir-athar/Market-Place-App

[React Native](#), [Node.js](#), [Firebase](#)

- Built a full-featured peer-to-peer marketplace supporting product listings, real-time chat, and transactional flows between buyers and sellers.
- Implemented secure user authentication, image upload, and listing management backed by a Firebase and Node.js architecture.

EDUCATION

BSc Software Engineering

2016 – 2021

Riphah International University

CERTIFICATIONS

- Mobile App Development (React Native) — Azad Chaiwala Institute (2023 – 2024)
- Software Engineering Fundamentals — Riphah International University
